Education

Samrat Ashok Technological Institute

May 2024

B.Tech in Electrical Engineering | CGPA: 8.26/10

Skills

Languages: Python, HTML, CSS, Javascript, Typescript

Frameworks: ReactJS, Next.js, Node.js, Express.js, TailwindCSS, Shadcn/UI

Database: MongoDB, PostgreSQL, Firebase

Tools: Git, Prisma, Postman, Digital Ocean, Hostinger

Experience

Full Stack Developer, Wiselogics Digital Solutions – Mohali, Punjab

March 2024 – Present

- Developed multiple web projects with the MERN stack, enhancing user experience and functionality to exceed client expectations.
- Increased search engine visibility by integrating SEO keywords with React Helmet, boosting rankings and web traffic.
- Built the Wiselogics LLC logistics platform, improving operational efficiency by simplifying data processing and utilizing Python for data scraping from the Safer API.

Full Stack Developer, Livinart Technologies – Bhopal, M.P

October 2023 – February 2024

- Built and launched the Liumgo website for EV-based delivery services using HTML, CSS, and Node.js, integrating embedded JavaScript to provide a seamless and responsive user experience.
- Optimized authentication and web services for Vinayak Finmart by developing and integrating multiple APIs, boosting system efficiency and security.
- Created the Jodo-Cabs landing page and developed REST APIs with Socket.IO for the Flutter app, enabling real-time features and enhancing user interaction.

Projects

Urban Garage

github.com/SurajG20/Urban-Garage

- Designed a scalable admin dashboard with the MERN stack, integrating APIs and Redux Toolkit for efficient state management and code reusability.
- Implemented a mobile-first design using Tailwind CSS, delivering a visually appealing and user-friendly interface.
- Leveraged function-based and OOP techniques within the MERN stack to improve code reusability and maintainability.

Bazaar

github.com/SurajG20/Ecommerce-Website

- Built a full-stack e-commerce platform with the MERN stack, creating a robust solution for online retail.
- Implemented JWT authentication to secure user data and ensure reliable management.
- Integrated Stripe for payment processing and Firebase for image storage, enhancing transaction security and media handling.
- Developed an admin panel to streamline product management, inventory control, and administrative tasks.

Cinemato

github.com/SurajG20/Cinemato

- Developed a dynamic movie website using React and Sass, providing users with an engaging and responsive interface.
- Integrated TMDB API to fetch and display movie data, and utilized Context API for efficient state management, ensuring seamless data handling and user experience.
- Deployed the application on Vercel, ensuring scalability and high availability.
